

Aidan Malka

07481177975

aidanmalka@gmail.com

Nationality: British & French

I am a dedicated Computing graduate from Bath Spa University (2:1) with experience in software development, and also retail, hospitality & property renovation. I am highly motivated, adaptable and always eager to learn new skills and apply them within my work. I am very active and enjoy rock climbing, the gym and cycling in my spare time. I'm friendly and approachable and I always strive to do the best I can in all situations. I was a member of the Army Cadets at the 151 and 156 detachments where I had many responsibilities such as planning and teaching lessons regarding a variety of subjects, from firearm safety & handling, to playing musical instruments.

EXPERIENCE

July 2026 - Current Peggy - Medicine Tracker

Continued development of my personal University project and turned it into a full product. A cross platform mobile app to manage and track medicine intake with prescription scanning for easy input. Currently being made available on Google Play and App Store.

TypeScript, React Native

June 2026 - Current Bath Football Club

Development of a data dashboard to bring information from various sources and make it available for the club's board meetings.
This is a side project, done on a voluntary basis for the club.

MS Power platform

University Projects

C++ Development

<https://github.com/Aidan0o0o/trivia>

Development of a C++ local multi player Trivia game (part of University work), drawing questions from an online API. Runs on Windows.

SKILLS

Software/Web Development
Python, C++, TypeScript,
JavaScript, HTML, CSS, React
Native & Expo, Microsoft
Power Platform

SOFT SKILLS

Hard working and dedicated
Responsible
Good Communicator
Friendly and approachable
Leadership

Army Cadets

Former Lance Corporal at
Army Cadets Kingston.
Performed various leadership
and educational roles within
the detachments 151 and 156.

LANGUAGES

English

Hebrew

Web Development

<https://aidanmalka.com>

Online CV Builder software which formerly ran my own CV online.
Using NodeJS, Express and Sqlite3 and running on an EC2 instance on AWS.

Mobile App Development

Individual App :

<https://github.com/Aidan0o/Devised-Project-Medication-Tracker>

A mobile medication reminder app that pairs via Bluetooth with an Arduino controlled medication box, which aids and verifies medication intake. Built with React Native, Arduino and Sqlite3

Group App :

<https://github.com/petericranston/Smart-Food-Tracker>

Development of multiple mobile apps both with a group and by myself using React Native Expo. Our main project The Smart Food Tracker helps users track the expiry dates of their groceries using AI.

Microsoft Power Platform Development

Development of an app for the Royal United Hospital using Microsoft Power Apps, Power Automate and Power BI
